

Spa & Hot Tub Dispenser

DIRECTIONS FOR USE:

1. Remove bottom cap from dispenser.
2. Fill feeder tube with chlorine tablets, bromine tablets or sticks.
3. Replace bottom cap and adjust to desired setting (see below for the feed setting table) and secure with lock ring.
4. For an even greater feed rate, fill with tablets and immerse dispenser completely, turning upside down to allow the air to escape from the tube then return to operating position. This procedure will allow further exposure of tablets to the water.
5. Newly filled spas or hot tubs should be properly conditioned to ensure effective chlorination. Contact your local dealer for water conditioning information.

*Additional anchor cord prevents dispenser from drifting away.

WARNING:

This dispenser is designed for use of Bromine or Tri-Chloro-S-Triazinetrione tablets or sticks-slow dissolving types only. DO NOT MIX with calcium hypochlorite or any other forms of concentrated chlorine or other chemicals. FIRE AND/OR EXPLOSION MAY RESULT. Thoroughly wash dispenser when changing chemicals. Use caution when filling feeder and do not inhale fumes. KEEP OUT OF REACH OF CHILDREN.

NOTE:

Weather conditions, frequency of spa or hot tub use, water temperature and number of bathers can affect Bromine and Chlorine use. In this case, it may be necessary to adjust dispenser to a higher feed setting.

Suggested Feeder Setting Table

Spa/Hot Tub Gallons	Spa/Hot Tub Liters	Feeding Settings* Tri-Chloro	Feed Settings* Bromine
200	757	¾	2
400	1514	1½	4
600	2271	2½	7
800	3028	3	9
1000	3785	4	12

*Feed rate is calibrated at the bottom of lock ring.
