

Foam Eliminator

PROBLEM SOLVER

Immediately Removes Foam in the Spa Water

Foam Eliminator is an exclusive formula that breaks up foam in spas, hot tubs, and whirlpools. Use **Foam Eliminator** whenever troublesome foam develops.

DIRECTIONS FOR USE:

To Eliminate Foam:

Shake well and dispense approximately one capful of **Foam Eliminator** onto the surface of the water while the water is being circulated. Wait 30 minutes and repeat treatment if foam has not subsided.

NOTE: If more than three capfuls of **Foam Eliminator** have been used within a 24 hour period, it is recommended that you clean your filter(s) with **Amerse Filter Revive** to prevent filter build-up. Test your water chemistry.
