

## Shock Oxidizer

### WEEKLY

#### **DO NOT PREMIX WITH WATER. ALWAYS ADD TO LARGE QUANTITIES OF WATER.**

**Shock Oxidizer** is a powerful oxygen-based oxidizer. When used regularly, this product will help eliminate contaminants introduced by bathers and environmental factors like rain and wind. This product will not raise chlorine levels or produce combined chlorine. This product is gentle on spa surfaces. This product restores sparkle and clarity to spa water. It will not increase calcium hardness or stabilizer levels. This product contains no chlorine or other disinfectants.

**DIRECTIONS FOR SPAS AND HOT TUBS:** This product contains no bromine or other sanitizer and should be used for oxidizer treatment only. Regular use of this product will remove most of the contaminants that accumulate in spa water.

**WHEN TO ADD SHOCK OXIDIZER TO YOUR SPA:** Add this product to spa water after every use, or once per week if the spa is not being used.

#### **HOW TO USE SHOCK OXIDIZER TO KEEP SPA WATER SPARKLING CLEAR:**

1. Every time the spa is used it must be oxidized. After every use, add 2 ounces of this product per 300 gallons of water. **DO NOT PRE-MIX WITH WATER. ALWAYS ADD PRODUCT TO LARGE QUANTITIES OF WATER.**
- NOTE:** Apply the required amount of this product evenly throughout the spa with the pump running. Add the full amount at one time using a clean and dry plastic scoop.
2. Run the pump for at least 30 minutes.
3. Turn the jets on and off once or twice after adding this product to improve the treatment.
