

SECURE STRAP™

XL

Contains:

12' Strap with Hardware

Metal Fasteners

Stainless Steel Screws

Directions:

1. With the cover in position on the spa, lay the strap across the center of the cover in the OPPOSITE direction of the hinge in the spa cover.
2. Determine where you would like to attach the metal fasteners on each side of the spa and mark screw locations at either end.
3. Attach the metal fasteners using the stainless steel screws.
4. Fasten the center connecting buckle and make a final length adjustment to the straps either at the buckle or at the adjustable glide near the metal fastener.
5. Strap should be snug to the lid so as not to allow movement of the cover.
