### 6.1 Personal precautions, protective equipment and emergency procedures

Evacuate area. Use respirator with combined filter (inorganic gas and dust), gloves, chemical safety goggles and body covering clothes. If material is decomposing, use self-contained breathing apparatus and a fully encapsulated suit. Wash thoroughly after dealing with a spillage.

### 6.2 Environmental precautions

Provide ventilation and confine spill. Do not allow runoff to sewers. The treated water should not be discharged directly to surface waters.

### 6.3 Methods and material for containment and cleaning up

Collect any spilled material and reclaim or dispose of in sealed containers in licensed waste. Avoid generation and spreading of dust. Avoid contact with water while the product is in storage. If the product is released prior to use, it should be recovered dry prior to the use of water in the final clean up.

### 6.4 Reference to other sections

Refer to section 8 and/or Section 13 of SDS for personal protection details.

## Section 7. Handling and Storage

### 7.1 Precautions for safe handling

Avoid handling product in a way that dust may be formed. If air contamination is above accepted levels, use an approved respirator. Do not use in a confined space without adequate ventilation and/or respirator. Avoid spillages and any contact with the skin or eyes.

### 7.2 Condition for safe storage, including any incompatibilities

Keep in original container. Keep container closed when not in use. Keep in a cool, dry, ventilated storage place. Protect from light, including direct sun rays. Avoid contact with any acids and combustible materials.
